## DETAILED ACTION

### *Drawings*

1. New formal drawings are required in this application. Note the Notice of Patent Draftsperson's Patent Drawing Review (form PTO-948) attached herewith. Additionally, the proposed drawing correction and/or the proposed substitute sheets of drawings, filed on April 23, 2001 have been approved. The application having been allowed, formal drawings are required in response to this Office Action.

### *Allowable Subject Matter*

2. Claims 16-36 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Independent claims 16 and 36 recite a battery case having an inwardly protruding projection having a first surface area which is welded to a lead plate having a welding surface area, the first surface area being smaller than the welding surface area. The art of record, namely Kurokawa et al., fails to teach or fairly suggest these limitations. As pointed out by Applicants, Kurokawa teaches the opposite configuration in Figure 1 (e.g., the first surface area being *larger* than the welding surface area). JP 4-162351 discloses a battery can having a bottom which has an indentation welded to a lead plate, but the indentation does not define a "projection" protruding inside the battery case. Omaru et al. disclose such a projection in Figure 1, but the

projection is touching a layer of adhesive tape (10) and is not welded to a lead plate.

Accordingly, as the claimed limitations are not fairly suggested by these references, the instant claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
